DIGITUFF SYNTHETIC PRO WHITE

Digituff Synthetic Pro White is specifically designed for colour dry toner printing, and combines high print quality with extreme handling strength, flexibility, weather resistance and durability, without the need for lamination. Compared to other synthetic products, it has virtually no static build up, to assure excellent run ability. Digituff is chemical, water and stain resistant, making it ideal for end uses that need to be cleaned and used repeatedly.

Vital Stats

- Extreme tear & water resistance
- Comprehensive range of weights
- Excellent anti-static properties
- Outstanding toner adhesion for sharp and high definition images
- Water resistant - including salt and chlorinated water
- > 140 CIE Whiteness
- Can handle high heat in excess of 240°C , and as low as -40°C
- Resistance to cleaning chemicals and bleach
- Specifically designed for **DTP** (Dry Toner Processes) printing
- High opacity allows full colour printing on both sides

Suitable Embellishments

Diecutting, Foiling, Overgloss, Folding

Suggested Uses

Menus, Signage, ID Cards, Parking Permits, Marine Manuals, Labels, Charts, Maps, Tray Liners, Childrens Books

Environmental Profile

Benign to the environment after disposal.

Recyclable.
